

## Wednesday Challenge Form

Group Members: Malik, William, Mason, Jess, Tyler, Max, ME

Problem Statement: Design a letter “E” on Sketchup to send it to another group. Receive a Sketchup and make it in real life.

Approach: We went for the easiest dimensions possible so that the group that would receive our sketchup would do it easily and we win. We received a really tough one. It had lots of weird measurements and was very hard to be cut. It was also really small. ON the 7<sup>th</sup> we met up, but actually instead of just two groups, we had three because there was an extra group. We all decided to use our sketchup because it was the simplest.

Solution:
