

Wednesday Challenge Form

Group Members: Half the Class; Team 1

Problem Statement: Get a marble into a bag using cut-off pipes. Each team member had to hold a pipe at least once.

Rules: You can't overlap pipes, touch pipes, or move with the marble in the pipes.

Approach: Just go however we could. We first went really fast, then I told my team to go slow. We went slow and then we got the first marble in, after the second team. We worked on our teamwork and got the other two marbles in before team 2.

Solution: We kept our pipes straight and made the marble go slow. Team 2 won.

Lessons Learned: Actually come up with a plan when we were supposed to.
